# DON'T TAKE THE BAIT

Phishing scams can look a lot like legitimate web pages. Do you know how to spot a fake? Before you log in to any page on the Internet, look carefully at your browser's address bar:

Do you see a **lock** symbol or **https**?  
This ensures a secure connection.

Do you recognize the web address immediately in front of the **first slash**? (These are not ODU sites: *anything.com/odu.edu/login*; *odu.edu.anything.com/login*)

And remember: ODU will **never** ask you to verify your ID or password by email.
