Connecting to Old Dominion University “AccessODU” Wireless Network Windows 8 Users

Configuring the Wireless Network Connection Properties

1. Be sure the wireless NIC is turned on and the most current drivers are installed on your computer.

2. Swipe in from the right edge of the screen and then tap **Settings**. (If you’re using a mouse, point to the lower-right of the screen, move the mouse pointer up, and then click **Settings**)

3. Tap or click the network icon (_WIFI or 🌐)
4. Tap or click the name of the network you want to connect to, and then tap or click **Connect**.

5. If you want to connect to this network every time it's in range, select the **Connect automatically** check box.

**Logging into the AccessODU Wireless Network**

1. When you open a browser, you will be redirected to an authentication page.

2. Enter all the information required and click **Submit**.

3. After successfully authenticating, you should be redirected to your homepage and now have full access to the internet.
**Note:** When you launch a web browser, you will not be redirected to the authentication page until you try to access a web site. Also, if your browser's homepage is set to a secure webpage ("https"), you will not be automatically redirected to the authentication page. Please try entering a non-secure webpage (ex. [http://www.odu.edu](http://www.odu.edu)) to be redirected to the authentication page.
