MonarchODU Wireless
Other Devices Manual Setup

For devices other than Windows, Mac OS X, Ubuntu, iOS, or Android that do not support automatic configuration

If the device supports WPA2 Enterprise with PEAP/MSCHAPv2 you can configure it manually with the following settings

Network SSID: MonarchODU
Security: WPA2-Enterprise
Encryption Type: AES
EAP Method: PEAP
 Authentication Method: MSCHAPv2
Username: Your MIDAS Username
Password: Your MIDAS Password
Certificate: Leave blank and/or disable certificate validation

Most gaming consoles do not support WPA2-Enterprise wireless security and as such will be unable to join the MonarchODU network
