eduroam Wireless
iOS Automatic Setup

To access the automated setup please connect to the AccessODU network and go to
http://onramp.wlan.odu.edu/eduroam

iOS devices which have been jailbroken will not be supported by the Technical Support Center, if you encounter problems on a jailbroken device please restore it to a non-jailbroken state and try again.

Automatic Setup:

On the first page please check that you accept the End-User License Agreement and tap ‘Start’
Enter your MIDAS ID@odu.edu when prompted and tap ‘Continue’

When prompted to install the eduroam Profile to your device, tap the ‘Install’ button
When you get the warning that this profile will change settings on your phone, tap ‘Install’ again

Enter your password at the prompt and tap ‘Next’
Once the profile is installed tap ‘Done’

At this point, eduroam is setup on your device

To verify that you have migrated from AccessODU to eduroam follow the instructions on the screen.
To verify, go to the home screen and tap ‘Settings’ then look at the name next to Wi-Fi

If it says ‘eduroam’ you’re all done

If it still says ‘AccessODU’ (like in the image) please tap on ‘Wi-Fi’ and follow the next step

Tap on eduroam and wait for the text to turn blue and the check mark to appear next to it. At this point you are on eduroam and fully configured.
Removal:

To remove the settings for eduroam, go to Settings from the home screen and tap on ‘General’

Tap on ‘Profile’
Tap ‘Remove’ to confirm removing the settings

At this point all eduroam settings have been fully removed from your device
