Before using this guide you should first try using the automated setup application. To access it please connect to the AccessODU network and go to http://onramp.wlan.odu.edu/eduroam

This guide is designed for devices for which the automated setup did not work.

iOS devices which have been jailbroken will not be supported by the Technical Support Center, if you encounter problems on a jailbroken device please restore it to a non-jailbroken state and try again.

**Manual Setup:**

Click on settings
Click on ‘Wi-Fi’

Choose ‘eduroam’
Enter your MIDAS ID@odu.edu and MIDAS password then click ‘Join’

Accept the certificate
You should now be dropped back to the Wi-Fi Networks page and you will see a check box next to eduroam.

Congratulations, you should now be connected to eduroam!
