Accessing MOVE through a Web Browser

Purpose:
The purpose of this document is to guide through the process of using an HTML 5 browser to log in into the Virtual Desktop Environment.

Pre-requisites:
1) MIDAS Account
2) Internet Connection (Preferably Broadband or High speed.)
3) Have an HTML5 compliant browser:
   a. Chrome 22 or later
   b. Internet Explorer 9 or later
   c. Safari 5.1.7 or Later
   d. Firefox 16 or later

Instructions:

1) Point your Internet Browser to http://move.odu.edu

2) Click on “VMware Horizon HTML Access”
3) Accept the university usage statement.
4) When asked, provide your MIDAS ID and Password

![Login Screen]

5) Select the pool you want to log in to by double clicking it. The “General Lab Software” Pool has all the applications available in the ITS lab and will provide you an opportunity to experience the Office 2013 suite and its add-on programs Project and Visio.

![General Lab Software Pool]

6) Once you are logged into the VDI session you can access the Office 2013 Suite. Start>All Programs>Office 2013>"Select your office applications"

Helpful Hints
Once you have logged into the MOVE Environment, here are some helpful hints to help you navigate the system in the Virtual Machine.

1) If you need to press CRTL+ALT+DEL you can use either CRTL+ALT+INS or use the tool bar at the top of the screen and click on “Send CRTL+ALT+DEL”
2) The VMware View client is also available for iOS and Android devices.
3) Connecting USB drives/device and sound redirection is only available in the VMware Horizon View client installation.
Access Virtual Desktop Environment

4) To print a document from MOVE select either the **ODU B&W Printers** or **ODUWPMFDa**.

Pharos Printer – Rule of Thumb

This is the rule thumb to help you choose which queue to print to. If you need to send a print job to any of the major open labs (Learning Commons, Webb Center, BAL, and Resident Halls) or in the main labs at the Higher Educational Center (VBHEC, PHEC, Tri-Cities) select the **ODUWPMFDa** print queue then select the printer you want to send your job to. The names of printers are labeled on the side of the printer. If you are sending a print job to a smaller lab with a smaller printer or to the stand alone wireless printers use **ODU B&W printers**.
