Installing GlobalProtect

VPN Client (Windows)

1. Go to odu.edu/ts/software-services/vpnclient. Click GET VPN SOFTWARE under the Windows heading (select 32 or 64 bit, depending on your computer). The software will download after you log in with your MIDAS ID and password.

2. Run the installer, and go through the prompts to install the software. (If prompted, enter credentials for a user with administrative rights to the computer.)
3. After the installer has finished, hit **Close** to complete the installation.

Connecting to the ODU VPN

1. In the Windows system tray, in the lower right corner of your screen, click on the **GlobalProtect** icon to display the connection window.

2. Enter **vpn.odu.edu** into the box, and hit **Connect**.
3. A Monarch-Key login page will appear in a pop-up window. Enter your MIDAS ID and password to log in.

4. If you are enrolled in two-factor authentication, you will also need to authenticate with your second factor. Request a push or enter a code.
5. Once connected, another pop-up window will appear as confirmation.

6. GlobalProtect automatically watches for updates. If you get a notification that a newer version is available, updating should be quick and easy.

Disconnecting from the ODU VPN

1. To disconnect, click the GlobalProtect icon in the system tray, and click the Disconnect button.
