Subject: Indirect Cost Allocation Report
For the Six-Month Period Ended December 31, 2014

The Indirect Cost Allocation Reports are available on the Research Foundation's web page at http://www.researchfoundation.odu.edu/reports/reports.html.

Attached you will find the Indirect Cost (IDC) Allocation report for the six-month period ended December 31, 2014. This report provides a combined reporting of the two University-approved IDC allocation methods currently in use: the Traditional Method and the Non-Traditional Method.

The Traditional Method covers the research activity of regular faculty members working within the capacity of their academic or administrative appointments. The Non-Traditional Method encompasses the remainder of the sponsored program activity of the University. Projects reported under this model are those of Self-Supporting Research Professional Positions (SSRP), University approved research centers and other affiliated entities for which the Research Foundation provides fiscal and administrative services.

In March 2015, the University allowed two changes to the allocation methods which have been reflected in this allocation:

- The calculation for the amount set-aside to fund the Intellectual Property Fund was reduced from 1% of total costs to 2% of indirect costs only.
- The calculation for the Research Foundation reserve funds was also modified from 1% of total costs to 2% of indirect costs only.

These modifications provided an additional $285,824 in funds for distribution back to the academic units and faculty discretionary accounts. We anticipate being able to maintain the reserve replenishment at these reduced rates for future allocation cycles without increase.

Funds placed in the Intellectual Property Fund are used to pay legal and related costs for the filing and maintain patents as well as costs associated with licensing activities. Research Foundation reserves are used to pay non-recurring expenditures such as legal, consulting and capital items not considered part of on-going operations. The allocation to the Research Foundations reserves is considered temporary until such time as reserves are restored to prudent levels.

The effective IDC rate for the University activity in the Traditional and Non-traditional models excluding affiliates is 20.75% for the current period representing a .93% decrease from the same period in the prior fiscal year. Total Indirect Cost Recoveries from all sources decreased $261,067 when compared to the same period in the prior fiscal year. The amount allocated to the Research Foundation for operations during the six-month period amounts to 44% of total indirect cost recoveries.
