Subject: Indirect Cost Allocation Report
For the Six-Month Period Ended December 31, 2017

The Indirect Cost Allocation Reports are available on the Research Foundation's web page at <http://www.researchfoundation.odu.edu/reports/reports.html>.

Attached you will find the Indirect Cost (IDC) Allocation report for the six-month period ended December 31, 2017. This report provides a combined reporting of the two University-approved IDC allocation methods currently in use: the Traditional Method and the Non-Traditional Method.

The Traditional Method covers the research activity of regular faculty members working within the capacity of their academic or administrative appointments. The Non-Traditional Method encompasses the remainder of the sponsored program activity of the University. Projects reported under this model are those of Self-Supporting Research Professional Positions (SSRP), University approved research centers and other affiliated entities for which the Research Foundation provides fiscal and administrative services. This report no longer includes the activity of the Virginia Commercial Space Flight Authority. Administrative fees received from the Authority are used to reduce the amount of operating costs funded through the allocation models.

Funds placed in the Intellectual Property Fund are used to pay legal and related costs for the filing and maintain patents as well as costs associated with licensing activities. Research Foundation reserves are used to pay non-recurring expenditures such as legal, consulting and capital items not considered part of on-going operations. The allocation to the Research Foundations reserves is considered temporary until such time as reserves are restored to prudent levels.

The effective IDC rate for the University activity in the Traditional and Non-traditional models excluding affiliates is 24.34% for the current period. Funding for the Research Foundation operations is 43% of total indirect cost recoveries for the current six-month period. Total Indirect Cost Recoveries decreased \$613,328 from the same six-month period in the previous fiscal year. The amount allocated to the Academic Units in the Traditional and Non-Traditional Methods represent 54.35% of indirect cost recoveries for the current period.
