Subject: Indirect Cost Allocation Report
For the Six-Month Period Ended June 30, 2014

The Indirect Cost Allocation Reports are available on the Research Foundation's web page at <http://www.researchfoundation.odu.edu/reports/reports.html>.

Attached you will find the Indirect Cost (IDC) Allocation report for the six-month period ended June 30, 2014. This report provides a combined reporting of the two University-approved IDC allocation methods currently in use: the Traditional Method and the Non-Traditional Method.

The Traditional Method covers the research activity of regular faculty members working within the capacity of their academic or administrative appointments. The Non-Traditional Method encompasses the remainder of the sponsored program activity of the University. Projects reported under this model are those of Self-Supporting Research Professional Positions (SSRP), University approved research centers and other affiliated entities for which the Research Foundation provides fiscal and administrative services.

In August 2013, the University-approved two changes to the allocation methods which are reflected in this allocation:

- The calculation for the amount set-aside to fund the Intellectual Property Fund was increased to 1.0% of total direct and indirect costs for the period.
- An additional amount of 1.0% of total direct and indirect costs for the period was approved for replenishment of the Research Foundation reserve funds.

Funds placed in the Intellectual Property Fund are used to pay legal and related costs for the filing and maintain patents as well as costs associated with licensing activities. Research Foundation reserves are used to pay non-recurring expenditures such as legal, consulting and capital items not considered part of on-going operations. The allocation to the Research Foundations reserves is considered temporary until such time as reserves are restored to prudent levels.

The overall effective IDC rate for the current six-month period of 11.19% is somewhat skewed due to a significant amount of subcontracted expenditures, not subject to indirect cost recovery, in the affiliated allocation. The effective IDC rate for the University activity in the Traditional and Non-traditional models excluding affiliates is 20.63% for the current period. The amount allocated to the Research Foundation for operations during the six-month period amounts to 45% of total indirect cost recoveries. For the entire fiscal year 2014, the amount allocated to the Research Foundation for operations was 41%.
